PocketOS

Quick start

Your home, at a glance. Setting up takes about five minutes.

Home Assistant · 2.4 GHz Wi-Fi · Your phone

1. **Charge and switch on**
   Plug PocketOS in with the USB-C cable. To switch it on, hold the Power button for 1 second.

2. **Join PocketOS from your phone**
   Point your phone's camera at the code on PocketOS's screen and tap to join. A setup page opens.

3. **Choose your home Wi-Fi**
   Pick your network and enter its password. PocketOS joins it, and your phone goes back to your Wi-Fi.

4. **Connect Home Assistant**
   On the settings page, open **Smart home** and follow the steps. Your devices appear on PocketOS.

Talk to your home, then let go

Help and updates

Help and questions: **www.pocketos.co.uk/support**
Updates install over Wi-Fi, with security updates until at least **31 December 2029**. Report a security problem, and read our statement of compliance, at **www.pocketos.co.uk/security**

Safety and care

- PocketOS has a built-in rechargeable lithium battery. Don't open, crush, puncture or heat it.
- Charge with the supplied cable from a USB charger or computer. Don't leave it charging on soft furnishings.
- Keep it dry and away from heat. Clean with a soft, dry cloth.
- If it swells, gets hot, smells or is damaged, stop using it and contact us.

Don't put PocketOS in household rubbish. Take it to an electrical recycling point.
